Alexandria Fertilizers

Foundation: Alexfert is an Egyptian joint co. incorporated under the provisions of the Law No. 8, 1997 for Investment and Incentives Guarantees. The company was established in October 2003

Activity: Production of nitrogen fertilizers using advanced technology as well as achieving the highest standards of quality, safety and environment preservation

Capacity: 635 000 tons of granular Urea (46.5% Nitrogen) each year. 400 000 tons of anhydrous Ammonia (99.8%) each year and 150 000 tons of granular Ammonium Sulphate each year.

Capital: Licensed Capital 500 Million US Dollars
Issued Capital 248,750 Million US Dollars

Marketing:

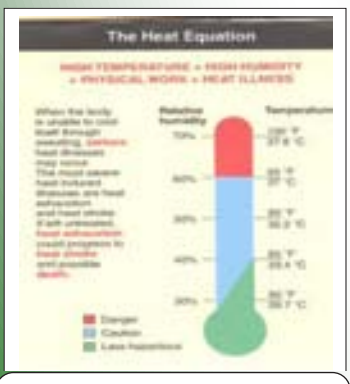
- The company has succeeded in exporting its entire product to the European and American markets, as well as the company has fulfilled its obligation towards domestic market by delivering the required volume localy.
- The company is commited to contracts with companies specialized in the transport, storage and shipping of its product from AbuQir & El Dekhila ports without any impact on production processes.
- The company has startd its production of granular Amonium Sulphate with capacity of 150 thousand tons/year & the production will be directed for both domestic & export markets.

Environment & Social Responsibilities:

The company aims at maintaining both its status in the global market as well as its competitive capability achieved by its product, by applying the following:
-Applying the latest Quality & Environment Management Systems by obtaining Certificates of conformity with international standards (ISO 9001/2008) & (ISO 14001/2004).
- Implementing the latest technology to achieve the highest rates of production, quality, safety and environmental preservation
- Working with the surrounding governmental institutions to raise the awareness of environmental and infrastructure development
- Sharing in developing the infrastructure of some schools and hospitals and providing them with all the necessary equipment all over Governorates of Alexandria & Beheira.

HSE Activity:

The company has succeeded in achieving 6 million safe working hours as a result of implementing more strengthen HSE-policy by searching for and analyzing all potential. hazards and issuing all control measures to eliminate or reduce the associated risk as far as reasonably practicable to prevent the occurrence of incidents, accidents, property damage or environmental losses



What you couldn't measure it

Foreword

In the light of the apparent development and the great role played by fertilizer industry, regionally and internationally, boosting sustainable development and enhancing food provision for millions of people, the Arab Fertilizer Association (AFA) is pleased to present 2014 Membership Directory.

The directory has become a vital reference for fertilizer industry and trade stakeholders and others.
We look forward for a prosperous fertilizer industry year.

The directory is available on AFA site: www.afa.com.eg

General Secretariat

AFA

Arab Fertilizer Assosiation

AFA is a non-governmental Arab International Organization established in 1975. AFA is operating under the umbrella of Council of Arab Economic Unity and exercising the status of observer at Economic & Social Council affiliated to Arab League.

AFA comprises Arab institutions and companies working in the fields of fertilizers manufacturing, trading in addition to other related fields.

AFA aims, generally, at coordinating and developing technical relations between member companies, together with all issues related to fertilizer industry.

AFA represents a framework through which Arab companies work and get to know the latest technological developments in fertilizer industry. It further provides Arab companies> representatives with the opportunity to strengthen relationships with international institutions, organizations and companies working in the field of fertilizer industry, trade and usage.

AFA Mission

Best utilization of available natural resources, utmost achievement of added value, effective contribution in economic and social development with reference to different kinds of fertilizers> industry, further support to constructive scientific research concerned with fertilizer industry and due attention provided for both environment and Man.

AFA Goal

AFA, generally, targets the development of fertilizer industry, materials and usage. AFA seeks the achievement of such a goal together with keeping environmental standards and requirements via intensifying and coordinating inter-cooperation efforts exerted in different fields and with related specialized bodies. In addition, AFA leading goal is manifested in promoting agricultural production to achieve food security and to practice not business-like work nor accomplish personal profits.

AFA Role

For AFA to accomplish the main goal, it carries out the required activities to such an end, including:

- Assisting members in handling production issues through exchanging information and expertise, solving problems existing between members or a member and other party peacefully and practicing conciliation and arbitration, if so required.
- Documenting technical information and economic, commercial and agricultural data related to fertilizer industry, materials and usage on both Arab and international levels, through the establishment of an information center in order to collect, exchange and distribute information among member companies in accordance with modern means and mechanisms.
- Working on the preparation of strategic studies on fertilizer industry in Arab regions on both Arab and international levels; in the light of the technological progress and international developments achieved and in a framework of efficiency, security and environmental preservation.
- Working on supporting and developing the technical and occupational training required for people working in fertilizer industry and materials in the Arab region; through organizing training courses, workshops and field visits.
- Convening and organizing conferences, forums and specialized seminars concerned with fertilizer industry and materials together with participating in related Arab and international events, and cooperating with Arab and international associations, institutions, organizations and experienced people.
- Issuing reports and specialized scientific and technical periodicals in order to: define fertilizer industry and materials, highlight its role in promoting agricultural production hence achieving food security, provide guidance on methods of application and pinpoint AFA activities and events in order to strengthen links between members and other related bodies.
- Seeking interaction and participation with specialized bodies, institutions and organizations when setting industrial and environmental standards related to fertilizer industry, materials and usage.
- Working on coordinating investments to reach a level of integration with reference to fertilizer industry and materials, in the establishment of common companies located in Arab region.
- Encouraging and enhancing practical scientific research.

AFA pursues its business and activities through:

- General Assembly
- Board of Directors
- General Secretariat
- Specialized Committees:
  - Economic Committee
  - Technical Committee
  - Health, Safety & Environment Committee.

General Assembly:

- The General Assembly is made of Ordinary, Associate & Observer Members.

Board of Directors:

The Board of Directors is formed of one representative from each group of active members belonging to the nationality of one of the Arab states and each group nominates its representative to the Board of Directors.

General Secretariat:

The Secretary General chairs the Secretariat Office and assisted by a full time staff in accordance with the organizational structure approved by the Board. The Secretary General is the official representative of AFA, as mentioned in the purposes stated in the articles of incorporation. Secretary General shall further enjoy all authority to practice his job tasks. Secretariat headquarters is located in Cairo, Arab Republic of Egypt.

AFA Specialized Committees:

Technical Committee:

The committee comprises representatives of member companies on the level of: technical, operations, maintenance, research managers. The Chairman of committee is elected by AFA Board and designated every two years.

Economic Committee

The committee is made of representatives of member companies on the level of commercial, marketing and sales managers. The Chairman of committee is elected by AFA Board and designated every two years.

Health, Safety & Environment Committee:

The committee is made of representatives of member companies on the level of Safety, Health & Environment managers.

MEMBERSHIP CATEGORIES

AFA

Ordinary Member:

Active members are Arab companies and institutions working in manufacturing and producing mineral fertilizers & its different materials i.e. Nitrogenous, Phosphatic, Potassic, and Sulphur.

Associate Member:

- Arab companies & institutions and chambers of commerce and industry working in the production of chemicals, equipment, manufacturing requirements and any by-products related to fertilizer industry.
- Arab engineering companies working in the field of designing or implementing projects concerned with mineral fertilizer and its raw materials.
- Arab industrial companies and institutions working in the economic and developmental fields besides the ones enhancing mineral fertilizer and its materials usages.
- The in process Arab companies producing fertilizer and its materials.
- Sulphur producing companies.

Observer Member :

- Non- Arab engineering companies working in the field of designing or implementing fertilizers and materials projects.
- Non-Arab companies working in economic and developmental fields related to mineral fertilizers and materials industry.
- Non-Arab companies working in the production of mineral fertilizers and materials, equipment, chemicals and fertilizer industry requirements. These companies are under execution until commercially producing.

Supporting Member:

Research centers, concerned with mineral fertilizer industry, companies working in fertilizer trade and its agricultural requirements and producing plastic packages together with transportation and shipping companies concerned with fertilizers and their raw materials .

Correspondent Member :

Correspondent members are individuals from non-member companies with expertise and competence in the relevant areas of fertilizers industry and its raw materials and use.

Section I: Producers: Fertilizer and Raw Materials: Ordinary member category 11

Section I I: Producers: Fertilizer and Raw Materials: Associate, Observer & Supporting members 45

Section III: New capacities: Under construction 51

Section IV: Chemicals & Catalysts 53

Section V: Producers: Liquid fertilizer, Micronutrients & NPK 61

Section VI: Engineering, Licensors, Contractors & Equipment Suppliers 69

Section VII: Traders 81

Section VIII: Shipping, Bagging & Others 101

Section IX: Investors, Consulting, Inspectors, Reseach & Studies, Pubblishers 109

President & Director General:
Mr. Miloude Louhichi

Company Profile:

Actually, the National Company of Fertilizers, ASMIDAL, is a Holding company. It was created in 1984 after the reorganization of SONATRACH, with main mission to promote and develop the sector of fertilizers by producing chemical fertilizers and ammonia. In December 1996, it became a stock company (SPA) with a capital 5941 000 000 DA entirely held by the State.

The Company had two production complexes of phosphate and nitrogenous fertilizers and ammonia with the necessary packaging installations and utilities.

As a result of the economic reforms inAlgeria, and the opening of its capital, ASMIDAL's new mission is the management of a set of portfolios of actions, participations and other transferable securities.

ASMIDAL manages today:

- A portfolio of participations of the three companies issued from the reorganization of its original activity, the production and the marketing of:
- 34 % of FERTIAL (after absorption of the subsidiary ALZOFERT) whose capital is 17697000 000 DA after the acquisition of holdings by the group VILLAR MIR in July 2005. This company is specialized in the production phosphate and nitrogenous fertilizers and ammonia,
- 45 % of KIMIAL whose capital is of 490 000 000 DA after the acquisition of holdings by ALKIMIA in April 2006. This company is specialized in the production of the STPP (input for the detergent producers),
- 45 % of SOMIAS whose capital is of 70 000 000 DA after the acquisition of holdings by International WOOD GROOP HOLDINGS in May 2006. This company is specialized in industrial maintenance,
- 20% of the capital of the Guarding Company - SGS. Annaba,
- 17% of the capital of the Higher Institute of Management of Annaba- ISGA.
- A subsidiary company at 100%:
- ASFERTRADE SPA, with a capital of 51 million DA. This company is specialized in packaging and marketing fertilizers and other agricultural needs.

ASMIDAL with three decades of experience has become an industrial group leader in the Algerian agriculture and an inescapable partner in the development of chemical fertilizers, ammonia and its by-products.

With its experience, ASMIDAL, no longer in control of its subsidiary companies, has nevertheless important capacities of know-how and financial resources that it is necessary to reinvest in crenels in synergy with its profession, namely:

- Investment in partnership in new projects of production of ammonia and by-products, in chemical fertilizers.
- Diversification of its business portfolio in order to make profitable placements and to minimize inherent risk-management.

www.ferphos.com

General Manager:
Mr. Bekhouche Ahmed

Company Profile:
Filial SOMIPHOS of FERPHOS Group is the unique Society Algerian who exploits, bill and market the natural phosphate:

- Joint-stock: 1.600.000.000 DZD.
- Vision: Costumer, the center of interest, SOMIPHOS is aware that Costumer's satisfaction by the quality of products and services is a fundamental value to ensure its durability.
- SOMIPHOS employees 1764 agents with different level of qualifications.
- Certified ISO 9001/2000; and ISO 14001/2004.

SOMIPHOS is organized in three operational centers:

1. The Complex Mining of DJEBEL ONK»C.M.D.O».
2. Facilities Harbor of ANNABA «I.P.A.»
3. The Center of studies and Research Applied to the Development «C.E.R.A.D.»

The Complex Mining of DJEBEL ONK, main entity of the subsidiary, situated in BIR EL ATER, to 100 km. to the South of the Chief place of the Wilaya of TEBESSA; the potential of production constituted globally of the careers of exploitation of phosphate and the factories of enrichment of the phosphate.
The Harbor Facilities of ANNABA, center of logistics and services, its main missions are:

- Receipt and discharge of the phosphate trains from the complex Mining of DJEBEL ONK.
- The storage of the phosphate
- The consignment and the loading of the ships of phosphate intended to the export.

The Center of studies and Research Applied to the Development is a scientific entity whose main mission is to develop the methods of research, exploitation, treatment and transformation of ores and under products of the different activities of the subsidiary.

Egypt
Tel: + 20 2 2795 4006
Fax: +20 2 279 6 4597
E-mail: info@cihc-eg.com

Chairman & Managing Director:
Mr. Yehya Mashaly

Company profile:
The Chemical Industries Holding Company activities are of diversified nature. The Company is responsible for managing a security portfolio for 18 affiliated companies, the paid capital of which reaches, according to the fiscal year ending in 30/6/2013, around 4.1 billion pounds.

Furthermore, the companies total activity returns amount to 9.5 billion pounds, for the same year, and total net profits 1.3 Billion pounds.

The affiliated companies' activities diversify too, including Fertilizers, basic chemicals, papers, cement and other kinds of industries. Although the production targets mainly fulfilling the needs of

the local market, some of such companies' exports sum to 621 million pounds in the mentioned above year. Also, the number of employees working in such companies reaches 34197 with total annual salaries of 2.1 billion pounds. The Holding Company pays due concern to conducting different restructuring processes in the affiliated companies, important of which are processes of technical restructuring, replacement and renewal besides contributing in the establishment of new companies.

Fertilizer industry companies come at the top of the companies to which huge investments were allocated for the processes of rehabilitation, replacement and renewal. For instance, KIMA Company rehabilitation project to order to operate by natural gas instead of its current used technology, which depend on water electro-analysis; the project took place through the establishment of an ammonia unit with a capacity of 1200 ton per day for the annual production of 530 thousand ton of urea and 220 thousand ton of ammonium nitrates, the estimated cost of which is750 million USD.

Chairman & Managing Director:
Mr. Abdel Hamid Nasser
Number of employees: 4500

Company Profile:
Established: 1/7/1998 basis of the Nasr Company for Fertilizers and Chemical In-

dustries (Suez / line), which was founded in 1946.
Chemical industry, especially chemical fertilizers and chemicals associated or derived from, or for the industry as well as conduct all operations related to the mode-specific or purpose in question. And have the right to buy, sell and carry out import, export and trade agencies and non-representation of foreign companies.

The company's products:

A) The main products:

A / 1) fertilizer regular:

- Prilled urea 46.5%.
- ammonium nitrate fertilizer 33.5% (regular).
- ammonium nitrate fertilizer 33.5% (micro-elements).
- liquid urea nitrate, 32% (regular).
- liquid urea nitrate 32% (micro-elements).

A / 2) composite fertilizer:

- Fertilizers regular vehicle (soluble solid)
- Fertilizers But sip vehicle (soluble solid)
- A liquid complex fertilizer
- fertilizers and paper

B)

- methanol concentration of 99.9%.
- polyethylene bags, heavy-duty.

C) products:

- liquid ammonia.
- nitric acid.
- liquid oxygen.
- liquid nitrogen.

Egyptian Chemical Industries "KIMA ASWAN"

(Ordinary)

P.O. Box: 81514 Aswan
Egypt
Tel: +20 97 2314500 / 2314501 / 2314502
+ 20 2 25740966 / 25740774 / 25740645
Fax: +20 97 2314505 +20 2 25771239
Email: info@kimaegypt.com
www.kimaegypt.com

Chairman & Managing Director:
Mr. Eid El-Hout

Company Profile:

Kima has been established by an adoption of the cabinet at 22/3/1956 with a capital of 16 million LE distributed on eight million shares with par value 2LE.
The par value increased to 5 LE for the one share on 5/11/2002 (the capital thus became LE 40 million).
The production started on 22/5/1960 with a production capacity of 1593 ton/day 20.5%N, modified to be 975 ton/day 33.5%N started on 20/6/1988.
Certified ISO 9001/2008 & ISO 14001/2004.

KIMA Products:

1-Prilled Fertilizer: Nitro KIMA Fort 33.5% Nitrogen with the micro nutrients.

2-Liquid Fertilizer: Ammonium Nitrate Fertilizer 30:33 % Nitrogen.
3-Pure Ammonium Nitrate 34.8% (Dense) for medical and industrial use.
4- Pure Ammonium Nitrate 34.8% (Porous) for industrial use.
5- Ferrosilicon Alloy (60 :75% Si)
6- Silica fume dry fine pozzolanic micro silica 92 – 95%SiO2.
7- Oxygen gas For Medical and industrial use 99.9 % O2 purity.
8- Nitrogen gas High Purity 99.9 % N2.
9- Ammonium Hydroxide 20:25% NH4 OH.
10-Hydro Chloric Acid High Purity 28% HCL.

KIMA2: New plant under evaluation and implementation phase:

Establishing KIMA 2 plant to produce 1200MT/day of ammonia based on steam reforming of natural gas for the purpose of producing:

- 160000 T/Y nitrokima fertilizer 33.5% N at KIMA1 plant.
- 60000 pure ammonium nitrate 34.8% N at KIMA1 plant.
- 530000 t/y urea fertilizer 46.5% N at KIMA2 plant.

Future targets:

In other strategic industries field production of pure silicon chips for electronic components and solar cells use for marketing in local and international markets.

Chairman & Managing Director
Mr. Ali Awad Al-Sayad

Company Profile

EFIC and Its Subsidiary "Suez Company for Fertilizer Production (SCFP)" are two of the leading companies for producing and marketing of phosphatic fertilizer and sulphuric acid.

Company's Products and Capacity

EFIC:

S.S.P (P2O5) : 900.000 MT/Y
Sulphuric Acid : 380.000 MT/Y

SCFP:

Sulphuric acid : 425.000 MT/Y
S.S.P (P2O5) : 300.000 MT/Y
Ammonium sulphate fertilizer: 300.000 MT/Y
Dicalcium phosphate : 20.000 MT/Y

Company's Achievements:

- EFIC established SCFP in the Suez Gulf area.
- EFIC shared with 99.88% in the capital of SCFP.

E.F.I.C. is internationally considered one of dominate global companies in fertilizer sector with a market share 70% of the domestic market.

Founded on Feb. 1998 under investment law No. 8/1997.
Authorized share capital US$ 1 billion.
Issued share capital US$ 320 million.

Location:
Economic zone, North West of Suez Gulf, Ain Sukhna
Area: 620 thousands meters

Activities:
Production and marketing of all sorts of chemical fertilizers and derivatives.
The company has acquired ISO 9001 - 2008 & ISO 14001 – 2004 & OHSAS 18001-2007
Direct labour: 670
Indirect labour about: 1000.
Phase I:
* Yearly production capacities: -
650,000 MT Granular Urea fertilizers.
400,000 MT Liquid Ammonia.
Marketing:
- As export oriented company, EFC distributes its urea product all over the world, USA, Canada, Europe, Asia & Africa.
- Yearly turnover US$ 380-400 million

Phase II:
- Contract coming into force on Dec. 2003, same capacities of phase I.
- Production started on May 2006.

Total capacities	**1000T**
Ammonia	800
Urea	1300

Company Profile:
NCIC founded in 1975, pioneer in manufacturing of chemicals and fertilizers.
In May 2006 NCIC opened its 2nd location «Chemical Production Compound» in Kom-Oshim Elfayoum.
The company implements the most advanced technologies in the production of:

- Granulated Single Super Phosphate Fertilizer (GSSP).
- Granulated Triple Super Phosphate Fertilizer (GTSP).
- Potassium Sulphate Fertilizer.
- Compound Fertilizer (NPK).
- Di ammonium phosphate (DAP).
- Phosphoric Acid
- Aluminum Sulphate (liquid & Solid)
- Concentrated Sulfuric Acid.
- Industrial and Medical Gases.
- Chlorine and Alkali products.
- Household insecticides.

Chairman:
Eng. Mohamed Mohamed EL-Kheshen.
General Manager:
Br. Gamal El-Dean M. El-Kheshen.
Contact Person:
Eng.Abdelhamed Gomaa Abu-Elaa.

Company profile:

Evergrow for Specialized Fertilizers Group of factories for producing and developing number of Compound soluble or liquid fertilizers with capacity of 120 thousand Mt per year. All fertilizers contain 100% nutrient elements with acidic effect to present the needs of all stages of different crops in all land. All raw materials and final products are free from heavy metals and other harmful elements; The Company assured from that through it uses very strict quality control System.
The Company is manufacturing the following fertilizers:

1. Potassium Sulfate fully soluble (0/0/50+18S).
2. Calcium nitrate group:
- Powder fully soluble (15.5/0/0/0+26Cao).
- Liquid (11/0/0+19CaO).
- Liquid (13/0/0+23CaO).
3. Phosphates fertilizers group:
   - MAP (12/61/0).
   - Magnum (17/44/0).
   - MKP (0/52/34).
   - Liquid Magnum (11/30/0).
4. Potassium nitrate fertilizers group:
   - Fully soluble powder (12/3/43).
   - Fully soluble powder (9/0/46).
   - Fully soluble powder (6/6/43).
   - Liquid potassium nitrate (3.5/0/11.5).
5. NPK fertilizers group:
   - Fully soluble powder (19/19/19).
   - Fully soluble powder (20/20/20).
   - Liquid fertilizers (7/7/7 & 7/14/7 & 7/7/14).
6. Magnesium nitrate (11/0/0/16 MgO).
7. Copper Sulfate.

The Company manufactures number of liquid fertilizers, and it is able to produce any soluble or liquid formula based on client needs.

Fax: Head Office:+20 2 267 13539
Plant: +20 57 229 1315
www.mopco-eg.com
Number of Employees: 606

Chairman & Managing Director:
Mr. Hassan Abdel Aliem

Company profile:
MOPCO is specialized in the production
The Misr fertilizers production Company (MOPCO) has been established on July 26, 1998 under the Investment Guarantee and Incentives Law No. 8 of year 1997. MOPCO is specialized in the production of urea. Its plant is located in the city of Damietta on an area of 400 thousand m2 and adjacent entirely to the port of Damietta on the Mediterranean Sea, giving flexibility in exporting of Granular Urea, which leads to a reduction in the cost of transportation.
The production at MOPCO's plant started in the second half of year 2008 with the capacity of 635 thousand-tons/year of granular urea and 400 thousand-tons/year of ammonia. The year 2009 is perceived as the first year of actual production following the commissioning production and start-up. Granular Urea is the main company's product at a daily production capacity of 1925 tons/day, through using natural gas as the main raw material.
Nevertheless, MOPCO is currently undergoing expansion. It is building two new ammonia units with 1,200 Mt/day capacity each and two new urea units with capacities of 1,925 Mt/day each at some site of existing plant. The full investment cost for the expansion is estimated to be 1.85 billion US dollars, and of which 1.05 billion US dollars are received as funding through mainly local banks.
MOPCO gives top priority for the marketing process of its products. The produced Granular Urea enjoys an excellent

reputation internationally. Urea is exported to more than (30) countries including Europe, the United States of America, Latin America, Africa and India. This diversification of markets is considered as an advantage for the company and strengthened its stability.

MOPCO is committed to protect and develop the environment by maintaining the highest standards of environmental protection through its operations. MOPCO selected the most advanced technologies which were designed to meet the national and international environmental laws, standards and legislations. Emissions are kept to a minimum complying with the limits set in the environmental laws and regulations. Self-monitoring environmental measuring station will be installed to assure continuous environmental quality control.

To meet the International Organization for Standardization (ISO requirements), MOPCO's goal is to be recognized and admired inside and outside Egypt for laudable environmental management and marketing performance. Accordingly, MOPCO is certified as ISO -14001, ISO-9001 & OHSAS-18001 .

Phosphate Misr Company (MPCO)

(Ordinary)

Bldg No. 9w\7 AL Lasilky St.
autostrade Maadi, Cairo, Egypt
Tel: (202) 25171058 – (202) 25167532
Fax: (202) 25171018
Email: info@phosphatemisr.com
www.phosphatemisr.com

Chairman:
Mr. Khaled El-Ghzaly Harb

Company profile:

- Established in 2009. Phosphate Misr is one of two major companies that produces Phosphate rocks in Egypt with production capacity of around 5 million tons a year from one of the biggest reserves in the world "Abu Tartour".
- On the other hand the company is on its way to sign a new contract for the exploration and exploitation of new sites in the south of Egypt where it is expected to increase its production capacity of phosphate rocks in the near future Ore Reserves
- The Tremendous Phosphate Ores of the Plateau are currently being exploited by Phosphate Misr.
- The Phosphate seam spread all over the plateau covering an area of about 1200 km, only one tenth of that area had been geologically explored by means of 375 surface drill holes, indicating the presence of about 715 million ton of Phosphate reserves having an average seam thickness of about 3.5 meters.
- A small area of about 24 km out of the already explored area of the plateau had been selected to start developing the mine at the present stage.

Dr. Shafik Ashkar

Jordan Phosphate Mines Company (JPMC) was established as a private shareholding company in 1949 and later registered as a

public shareholding company in 1953.
The Company's objectives include phosphate exploration, mining and marketing, the manufacture of fertilizers, and the establishment of initiatives in related fields. JPMC is headquartered in Amman, with its main mining operations located in Al-Hassa, Al-Abiad and Eshidiya (south of Jordan), with the addition of a smaller operation located in Russeifa. JPMC also owns and operates an industrial complex in Aqaba for the production of chemical fertilizers.

JPMC has a special standing among international companies producing and manufacturing phosphate ore, which is essential to the fertilizer Industry, and considered a major element in food production worldwide.

2006 was a turning point in the history of JPMC. The Company was privatized in line with the government's strategy aimed at privatizing public shareholding companies, which reflects positively on both the performance of companies and the national economy. In its quest to meet the challenge of global competition, JPMC underwent a fresh start that witnessed changes in recent years in the financial, production marketing and administrative areas. Investments were increased in the transformative industries projects that shape the future of the phosphate industry.

Jordan Abyad Fertilizers & Chemicals Co. Ltd. (JAFCCO)

(Ordinary)

P.O. Box 4455 Amman11131
Jordan
Tel: +962-6 551 2095
Fax: +962-6 551 2094
Email: jafcco@wanadoo.jo

CEO:
Dr. Eyad Hindawy

Company Profile:
Jordan Abyad Fertilizers & Chemicals Co. Ltd. (JAFCCO) is one of Jordanians leading companies in the chemicals & fertilizers industrial field established in 1997. The company is presently well positioned within the Jordanian market providing high quality products to meet the country's needs. The company is currently gearing itself towards a growing demand for fertilizers in other Arab countries such as Palestine and Saudi Arabia. JAFCCO main products are Potassium Sulfate (K_2SO_4) and Hydrochloric Acid (HCL).
K_2SO_4 has become an essential component of the most important fertilizers worldwide since it was first used over 130 years ago. Its CL content is less than 0.5% and its dissolution capacity is 100%. This makes it suitable for use with most kinds of irrigation systems.

Potassium sulfate (K_2SO_4) is especially ideal in drip irrigation. HCL is essential for such industries as metal galvanization and the production of detergents used to clean wires and pipes. JAFCCO currently produces HCL at 30-32% but it is possible to prepare it at other concentrations as may be requested by the client. At the present time, JAFCCO produces (5500) MT of K_2SO_4 annually while its production of HCL stands at (6800) MT annually. Almost 70% of both products are sold to Arab neighboring countries and 30% is exported to several European countries.
Within the coming three years JAFCCO plans to expand its present infrastructures to establish a sulfuric acid factory which will supply the present SOP facility with raw materials. SOP production capacity will be boosted to (15000) MT yearly. World - class K_2SO_4 (100%) soluble and essential for NPK production is already being produced at our present factory.

General Manager:
Mr. Ibrahim Al-Rawashdah

Company Profile:

Indo-Jordan Chemicals Company Limited (IJC) is pioneer in producing Phosphoric Acid and Sulphuric Acid at the state of art high-tech production facility located at Eshidya, Jordan.

The Company was incorporated in March 1992 for the purpose of setting up and operating a Phosphoric Acid and Sulphuric Acid Complex in Jordan by availing the Rock Phosphate from Jordan Phosphate Mines Company Ltd. Jordan (JPMC) and exporting the entire production of Phosphoric Acid predominantly to across the Globe.

The Project was commissioned in 1997 and has been operating successfully since then. The Project Complex consists of a 225,00 MT/Year Phosphoric Acid Plant, a 660,000 MT/Year Sulphuric Acid Plant and associated Utilities and off-site facilities adjacent to the Phosphate Mines of JPMC at Eshidiya and also Acid Storage facility at port city Aqaba.

The USD 170 Million project was successfully implemented well within the time and cost estimate.

1,000 T

Phosphoric Acid (P_2O_5):	225

Mr. Khalid Al-Mana,
Tel: +966 (0) 1 225 9099
Fax: +966 (0) 1 225 9080

SABIC profile:
Saudi Basic Industries Corporation (SABIC) ranks among the world's top six petrochemical companies. The company is among the world's market leaders in the production of polyethylene, polypropylene and other advanced thermoplastics, glycols, methanol and fertilizers.
SABIC's businesses are grouped into Chemicals, Polymers, Performance Chemicals, Fertilizers, Metals and Innovative Plastics. SABIC has significant research resources with six dedicated Technology & Innovation Centers in Saudi Arabia, Europe, the USA and India. The company operates in more than 40 countries across the world with 33,000 employees worldwide.
SABIC manufactures on a global scale in Saudi Arabia, the Americas, Europe and Asia Pacific. SABIC's overall production has increased from 35 million metric tons in 2001 to 59 million metric tons in 2009.
Headquartered in Riyadh, SABIC was founded in 1976 when the Saudi Arabian Government decided to use the hydrocarbon gases associated with its oil production as the principal feedstock for production of chemicals, polymers and fertilizers. The Saudi Arabian Government owns 70 percent of SABIC shares with the remaining 30 percent held by private investors in Saudi Arabia and other Gulf Cooperation Council countries.
Vision and Mission:
SABIC's vision is to be the preferred world leader in chemicals. Its mission is to responsibly provide quality products and services through innovation, learning and operational excellence while sustaining maximum value for our stakeholders
Safety, Health, and Environment (SHE):
At SABIC, employee health and safety is a top priority. The company insists on similar standards for everyone affected by its activities, from suppliers and customers to the communities in which it operates. In environmental matters SABIC maintains the highest international standards.
SABIC has made SHE systematic; integrating process safety, environmental protection, health, occupational safety, emergency preparedness, and response management systems under a single approach. The aim is to manage overall business risk effectively and consistently, while continually improving operational performance. This holistic system is rolled out to all offices and affiliates, as a tool to help ensure consistently excellent SHE programs and performance at all facilities.
Customer Satisfaction:
Customer loyalty has been key to SABIC's success. While maintaining high standards and adopting contemporary

marketing methods, SABIC has been constantly striving to further expand its bonds with its customers. Over the years, the company has been building lasting relationships and seizing every opportunity to reach out to them.

The importance of taking SABIC products straight to the customers has always been stressed by the company. Every year, the company not only showcases its products around the globe, but also hosts seminars and conferences to spread the SABIC message of quality and reliability.

SABIC Fertilizers:

SABIC has three fertilizer affiliates:

- Saudi Arabian Fertilizer Company (SAFCO),
- Al-Jubail Fertilizer Company (AL-BAYRONI) and
- National Chemical Fertilizer Company (IBN AL-BAYTAR).

Its Fertilizers Strategic Business Unit (SBU) consists of six functional units, Urea BU, Ammonia & Phosphates BU, Manufacturing, Business Strategy, Technology Management and Supply Chain Management.

SABIC is a major producer of ammonia and the world's largest producer and exporter of granular urea. The company produced more than 6,000,000 metric tons of fertilizers in the year 2009.

Mr. Najib Mrabet
General Manager:
Mr. Najib Mrabet

Company Profile

Tunisia is a leading country; worldwide, as far as natural phosphate and mineral fertilizers are concerned.

GCT owns 4 industrial sites located in SFAX and M'DHILLA (for TSP), GABES (for Phosphoric Acid, DAP, DCP and AN) and SKHIRA (for Phosphoric Acid).

GCT has developed within its field of activity own processes and made a considerable contribution within its boundaries in Tunisia and worldwide.

The phosphate field holds an important position within the Tunisian economy both in labour level and in trade balance worldwide. The Tunisian phosphate industry is third amongst the international operators in the field. Natural phosphate and its by-products (MGA, DAP, TSP, DCP...) are exported to 50 countries in 5 continents.

GCT is approaching traditional customers with potential capacity of marketing phosphoric fertilizers to launch new projects.

GCT established long term partnerships with CHINA, INDIA and looking forward for new alliances with other partners.

GCT successfully implemented SACF JV in China with CNCCC (1985) and TIFERT (2013) in Tunisia with CIL and GSFC from India.

GCT is investing in a new TSP project in Tunisia with a capacity of 500000 MT/ year expected to be in operation in 2015.

Mr. Najib Mrabet
General Manager**:**
Mr. Najib Mrabet

Company profile:
The Compagnie des Phosphates de Gafsa (CPG) is an anonymous public enterprise with an industrial and marketing character, operating in the exploitation of phosphate deposits in Tunisia

It was in 1885, while surveying the region of Metlaoui, south western part of Tunisia, the French amateur geologist Philippe THOMAS discovered powerful layers of calcium phosphates in the Northern hillside of JEBEL THELJA. This discovery was at the origin of the foundation in 1896 of the «Compagnie des Phosphates et du Chemin de Fer de Gafsa» announcing the establishment of a national phosphate industry in the country.

The Compagnie des Phosphates et de Chemin de Fer de Gafsa has gone through several transformations in its structure during the long course of its history, before attaining its current status and becoming the «Compagnie des Phosphates de Gafsa» in 1976. The CPG was one of the earliest phosphate extraction companies in the world.

With over a century of experience in mining, upgrading and marketing Tunisian phosphates, CPG is one of the leading phosphate producers worldwide with a current annual production capacity exceeding 8 million metric tons. CPG is the world's fifth largest phosphate producer.

In Gafsa mining Bassin, there are 5 production sectors for phosphate extraction and treatment located in Mdhilla, Metlaoui Kef Schfaier, Metlaoui Kef Eddour, Moularès and Redeyef.

CEO:
Mr. Mohamed Rashid Al Rashid

Company profile:
Ruwais Fertilizer Industries (FERTIL), a one of ADNOC Group of Companies, was established in October 1980 as a joint venture between Abu Dhabi National Oil Co. (ADNOC) and TOTAL, with a shareholding ratio of 2:1 respectively. Construction of a processing plant began in 1980 and production started in December 1983.

The prime objective behind establishing the company was to utilize the lean gas supplied from the onshore fields of Bab, Asab and Thammama-C, to manufacture fertilizers and to market them locally and internationally. The Plant is located in Ruwais Industrial zone, about 235 km from the city of Abu Dhabi. It comprises an Ammonia and Urea processing plant.

The installed capacity of the ammonia plant is 1,050 MTPD and 1,500 MTPD for urea. The plants have fully integrated utility units with storage facilities. The company has been continuously improving its technology and productivity. Today, ammonia production stands at 1,310 MTPD and urea 1,850 MTPD.

Acting Chief Executive:
Mr. Faisal Al Mahroos
General Manager Marketing:
Mr. Khalid Al Sabbagh

Company profile:
BAPCO, wholly owned by the Government of Bahrain, is engaged in the exploration and production of crude oil, its refining into high quality finished products and their sale to customers from all parts of the globe. About 95% of products are exported, the main products being diesel, jet fuel, gasoline, naphtha, fuel oil, asphalt and solid sulphur.
In its upstream business, BAPCO uses advanced techniques and methods to explore for new oil and gas reserves, and obtain more accurate data on existing reserves. Then, to maintain crude oil production at optimal levels, advanced drilling techniques are applied to new and existing wells.
The BAPCO refinery is one of the largest and most sophisticated in the Middle East and the oldest in the GCC. It refines over 265,000 barrels of crude per day. The products from this facility are capable of meeting the very highest quality standards and most customers are based in the Middle East, India, the Far East, South East Asia and Africa.
As a consequence of its production of clean fuels, BAPCO produces 500 tonnes of sulphur per day. Its solid sulphur production facilities are amongst the most modern, producing sulphur pastilles of 2 to 4 mm diameter that are both very easy to handle and minimize generation of dust during handling.

Dr. Hamed KorKor

Company profile:
In view of natural gas industry vital role to the country's economy and according to the vision of the Ministry of Petroleum, it was decided to establish the Egyptian Natural Gas Holding Company, (EGAS) as an entity focusing on the natural gas chain of activities.
EGAS was established in August 2001, adopting an effective action plan to organize and diligently handle the activities

of the natural gas resources of Egypt and adding value to the Egyptian economy. The main objectives of EGAS are the following:

- Prepare action plans for natural gas industry and related projects.
- Develop techno-economic studies for gas projects.
- Manage sales gas transmission & distribution systems and coordinate all related activities.
- Develop LNG projects individually or with national and international partners.
- Participate in exploration, development and production from gas discoveries according to the prevailing laws and regulations.
- Develop the natural gas industry database.
- Study and define optimum locations for gas projects.

Company profile:

Fauji Fertilizer Company Limited (FFC) is the largest urea manufacturer in Pakistan and a leading national enterprise with global outlook, effectively pursuing multiple growth opportunities, maximizing returns to the stakeholders, remaining socially and ethically responsible. Incorporated in 1978, FFC is now operating three world scale urea plants with an aggregate design capacity of over 2.0 million metric tonnes per annum. FFC operates the largest marketing network in the Country, with more than 50% market share (nearly 3.5 million metric tonnes of fertilizer per annum for both FFC and Fauji Fertilizer Bin Qasim Limited (FFBL)) under its brand "SONA" which means gold. The Company holds diversified stakes of 50.88% in FFBL, 43.14 % in Askari Bank Limited, 6.79% in Fauji Cement Company Limited and 12.5% in Pakistan Maroc Phosphore SA (PMP). In line with the strategy of diversification, FFC Energy Limited; the pioneer among the Wind Power Plants in Pakistan is contributing 50 MW to the national grid and further committed to address shortage of energy in the Country. FFC Al-Hamd Foods Limited is setting up a state of the art (individually quick frozen fruits and vegetables) plant; the first of its kind in Pakistan.

The Company is listed on all three Stock Exchanges of the Country and stands high amongst the largest corporate entities. FFC's securities are one of the most actively traded scrips on the Stock Exchanges. It has figured prominently amongst the top 25 Companies at the Karachi Stock Exchange (KSE) and has been declared FIRST thrice. It has won recognition in the form of various Corporate Awards by local and foreign prominent corporate forums. PLIMSOLL, in 2013, declared FFC as 13th most profitable and 39th largest company in world's top 100 fertilizer manufacturers.

Besides being one of the largest contributor to national exchequer and Fauji Foundation (the largest welfare organization in Pakistan) FFC itself play prominent role in the areas of education, health, disaster relief and environment as part of Corporate Social Responsibility (CSR) activities. Company is determined to incorporate United Nation Global Compact (UNGC) principles into its strategy and governance for business sustainability.

Internationally FFC is well recognized as a member of International Fertilizer Association (IFA), Arab Fertilizer Association and UN Global Compact USA.

Director, Marketing & Refining Department:
Mr. Sultan Ahmed Al-Muhairy

Company profile:

Abu Dhabi National Oil Company (ADNOC) was established in 1971, to operate in all areas of the oil and gas industry and since then has steadily broadened its activity establishing companies and subsidiaries and creating an integrated oil and gas industry in the fields of exploration and production, support services, oil refining and gas processing, chemical and petrochemical, maritime transportation and refined products distribution.

The Supreme Petroleum Council (SPC), chaired by H.H. Sheikh Khalifa Bin Zayed Al-Nahyan, President of the UAE and Ruler of Abu Dhabi formulates and oversees the implementation of Abu Dhabi petroleum policies.

During the past four decades, ADNOC has expanded its business activities, enhanced its competitive position and managed to become one of the world's leading oil companies with substantial business interest in upstream and downstream activities, including transportation, shipping, marketing and distribution.

ADNOC's efforts in the exploration and production field have concentrated on assessing undiscovered reserves and optimizing hydrocarbon recovery by improving the reservoir management.

Over the last few years significant achievements were made in the expansion and development of gas fields to meet increased demand from industry gas users and gas injection requirements in order to enhance the oil and condensate recovery from the producing fields.

ADNOC is committed to sustainable development, ensuring a harmonious balance between people's needs and Earth's resources, while its track record in HSE sets the standard for the rest of the Arabian Gulf.

Giving top priority to education, ADNOC established a number of instantiations that train and develop a qualified UAE cadre for energy sector. The Petroleum Institute, the ADNOC Technical Institute, the Achievers' Oasis and other scholarship programs are but a few examples of ADNOC's educational projects.

ADNOC has 15 subsidiary companies working in the various fields of the oil, gas and petrochemical industry as well as crude oil and gas transport and services. They include ADCO, ADMA-OPCO, GASCO, ADGAS, ZADCO, TAKREER, NDC, ESNAAD, IRSHAD, FERTIL, BOROUGE, NGSCO- ADNATCO, ADNOC Distribution, ELIXIER and Abu Dhabi Gas Development Company Ltd (Al Hosn Gas).

Mr. Niels Kegel Sorensen

Company Profile:
Founded in 1940 by Dr. Haldor Topsøe as a research-based organization for development of chemical processes and catalysts, Haldor Topsøe A/S has a prominent international record in heterogeneous catalysis and catalytic processes.

The main activities are in chemical industries, and more specifically in the production of fertilizers, other chemicals and petrochemicals, oil refining, gas conversion and related technologies, energy and environment.

The Topsøe range of activities include supply of process know-how, engineering services and catalysts for ammonia synthesis, methanol synthesis, tubular steam reforming (hydrogen, carbon monoxide, and synthesis gas), shift conversion, methanation, desulphurization of hydrocarbons, hydroprocessing of residual and heavy oil fractions, sulphuric acid and formaldehyde.

Haldor Topsøe A/S has also developed technologies for catalytic combustion of solvents and other combustibles in off-gases as well as methods for desulphurization and denitrification of flue gases.

Mr. K.N. Agrawal

Company profile:
Mansoura for Resins & Chemical Indus-

tries Co. is producing several kinds of products which use in the Egyptian industries which are:

- Formaline 37% «IS09001 «, Form Urea, Calcium Stearate, Sodium Stearate, Zinc Stearate.
- Anti Acids & chemicals (used as a coating for Building, Floors & Surfaces)
- Furan Resin. Phenol Resin
- Moulding Chemicals (manuf. of Electric parts. Fans), Phenole Granular Powder [Bakelite], Urea Moulding Powder
- Foundry Resins (for Foundary companies) Furan, Phenol (cold-set 9666), Shalco, Hotbox, Coating Sand.
- Adhesives (manuf. of Furniture, Paper & Carton etc..)
- Urea Formaldehyde 60%, Phenol Formaldehyde (alcoholic, aquous), P.V.A, Safe Bond.

Other products:
[Dry Resin, Liquid Resin] which use in manufacturing of grinding wheels and friction materials (Preak lining).
In addition to other products such as Water Treatment Chemicals for Boilers & Cooling Towers, special kinds of Fertilizers.

New Product:
Fortified Rosin «CALPHOSIS I 00».
This is used tor sizing of paper / paperboards in acidic medium (pH4 to 5.5). To resist penetration of aqueous liquids, inks, milk into paper.
All products are available now on the Arabian markets: Saudi Arabia - Jordan - Yemen- Libya - Kuwait - Palestine - Syria.

Chairman:
Mr. Hisham Mostafa Fahmy
Executive Manager:
Mr. Medhat Ebrahim

Company Profile:
SPREA MISR is a leading Egyptian company in manufacturing and export Chemicals and Plastics. It was established in 1989 and was focusing from the first day on producing a high quality product according to strict quality control procedures, which are being undertaken in our industrial complex located in the biggest industrial city in Egypt (10th of Ramadan City) about 63 km East North of Cairo.
During the last 16 years (Sprea Misr) has striven to gain a strong foothold in both the Egyptian and the international market. Today our yearly capacity is increasable; our products are being exported to more than 20 countries all around the world in Africa, Middle East, Europe, USA and Latin America.

Our facilities include 5 major factories to produce the following productions:
- Urea Moulding compounds
- Melamin Moulding compounds
- Phenolic Moulding compounds
- Formaldehyde
- Formurea

- Urea formaldehyde Glues
- Melamine Formaldehyde Resins (Liquid and Solid).

Owing to the long experience of Mr. Giorgio C. Cànelli (Ex-Chairman of Board), high technology and the modernized machinery operating in our factories, as well as the top quality materials, we have succeeded to penetrate varieties of markets all over the world.

We have a sister company for Plastics (Plastichem) SPREA MISR Is ISO (9002) since 2000.

Company profile:

Indo Amines Limited established in the year 1994 is one of the leading Manufacturers and Suppliers of Fine chemicals, Intermediates, Specialty chemicals and Surfactant formulations for various industries, Agrochemical, Mining and Fertilizer industry in particular.

It has highly focused and skilled R & D teams that continuously work with different customers addressing their basic concerns and evolving cost effective solutions for different applications. Extensive research efforts based on specific inputs from the Fertilizer, Mining and Agrochemical Industry have resulted in development of tailor made performance chemicals for various applications in this industry.

Some of our offerings to the Fertilizer, Mining and Agrochemical Industry are:

- Conditioners/ Anticaking Agents for promoting free flow characteristics and reducing lump / cake formation of various fertilizer grades.
- Defoamers / Antifoaming agents for controlling foam in Phosphoric Acid / Ammonium Nitrate / Ammonium Phosphate manufacturing process.
- Filtration Aids / CHM for enhancing crystal growth in Phosphoric Acid manufacturing process.
- Dedusting / dust control additives for controlling dust levels in material handling.
- Custom Coloring Agents (Ingrained Body colors & surface colors) for distinct Brand identification of different fertilizer grades.
- Granulating / Binding Additives for better granulation of different fertilizer grades.
- Flotation reagents for ore and salt benefaction / enrichment. Reagent Formulations available for Rock Phosphate / KCL/ Feldspar / Iron ore Emulsifiers for Agrochemical and Pesticide industry.
- Etc.

INDO AMINES LIMITED is an ISO 9001: 2008 certified company and follows established and widely accepted standardized procedures and norms.

Fax: +44 1642 522542
www.matthey.com

Key contacts:
Ammonia Marketing Manager:
Mr. John Brightling
Marketing Communication Officer:
Mrs. P.A. Mureay

Company Profile:

Johnson Matthey Catalysts is a supplier of both precious and base metal catalysts. It offers products for a diverse range of industries:
from fuel cells and environmental catalysts to petrochemicals, edible oils and specialist oil and gas purification.
For the fertilizer industry, Johnson Matthey is able to offer the full range of catalyst products; from precious metal gauzes for nitric acid production and the AMOXIS through to the full range of KATALCOJM catalysts for ammonia plants to hydrogen removal catalysts for urea manufacture. It is a leading supplier of catalysts and services in all of these industry areas.
The Middle East is an extremely important market for Johnson Matthey.
Many new plants under construction in the region are using KATALCOJM catalysts. This includes the largest ammonia plant in the world, SAFCO IV in Saudi Arabia. This plant is based on the Uhde Dual Pressure Process and KATALCOJM catalysts to produce 3,300 tpd of ammonia.

الطاقة الإنتاجية

650 ألف طن سنوياً من اليوريا المحببة (46.5 % نتروجين.
400 ألف طن سنوياً من الأمونيا السائلة (99.8 %)

كيميائى / محمد عادل الدنف
رئيس مجلس الادارة والعضو المنتدب

المبيعات المحلية - التصدير

تساهم الشركة في سد العجز في الأسمدة الازوتية بجمهورية مصر العربية حيث يوجه جزء من إنتاجها للسوق المحلى والجزء الأكبر للتصدير الخارجي لكافة قارات العالم نظراً لما يتمتع به منتج اليوريا الخاص بشركتنا من جودة فائقة ومواصفات عالمية

وكان لشركة حلوان للأسمدة السبق في الحصول على تسجيل منتج اليوريا الخاص بها فى النظام الأوروبى (Reach) طبقا لمواصفات واشتراطات الاتحاد الاوروبى لتصدير المنتجات الكيميائية ليلائمها لتطبق الشركة معايير جودة صارمة لضمان أقصى درجات الجودة لتجنب اى عيوب فى المواصفات لذا اكتسب منتج اليوريا الخاص بشركة حلوان للأسمدة سمعة عالمية ممتازة.

مسئولينا البيئة

تحافظ الشركة على مكانتها في الأسواق العالمية وما حققه إنتاجها من ميزة تنافسية نظراً لان الشركة تطبق أحدث النظم الدولية لادارة الجودة والبيئة والسلامة المهنية ولقد الحصول على شهادات المطابقة مع المواصفات الدولية للجودة ISO 9001/2008"" " المواصفات الدولية للبيئة" ISO 14001/2004 "وكذلك تم الحصول على شهادة السلامة والصحة المهنية "OHSAS18001/2007

هدفنا الاساسي هو المحافظة على نظافة البيئة المحيطة بالمصنع من كافة أنواع التلوث واضافة ذلك يتم تكاليف المعمل المركزي لجهاز شئون البيئة بأخذ عينات دورية عدة مرات في العام للتأكد ولضمان استمرار عدم زيادة نسبة الانبعاثات من المصنع عن الحدود المسموح بها وجاءت كافة النتائج منذ تشغيل المصنع حتى الآن اقل بكثير عن الحدود المسموح بها طبقا لقانون 4 لسنة 1994 وتم عمل ربط ذاتى مستمر الكترونيا لهذه الانبعاثات مع جهاز شئون البيئة من خلال الشبكة القومية للإتصالات لتكون نسبة هذة الإنبعاثات مراقبة بصفة دائمة من قبل جهاز شئون البيئة وجميعها متوافقة مع قانون البيئة المصرى رقم 1994/4 – والقانون 2009/9

Vice Chairman:
Mr. Mohamed Mostafa H. Hilal

Company profile:
GizaTec provides eco-friendly fertilizers to support the mandate of the farmers to

increase crop yields and improve crop quality. GizaTec fertilizers are based on proprietary agricultural technology jointly developed by company scientists and international research institutes.

GizaTec has extensive experience in international agriculture. GizaTec fertilizers address plants and soils, and have been proven to enhance produce quality, increase crop yields and improve soil fertility while being friendly to the environment and healthy to the produce consumer. GizaTec, produces two main groups of products; Vigro and Agrite.

Agrite series are natural bio-mineral controlled-release powder fertilizers and amendments for optimum growth and yield in all crops. Agrite provide soils and plants with macro and micro nutrients, minerals and various natural mineral supplements. Agrite contain activated clay minerals and capable micro-organisms. It is rich in micronutrients, trace elements, minerals and natural growth regulators. It is a mixture of several geo-natural and nutritive components that work in synergy with each other.

Vigro series are organic-based liquid fertilizers for vigorous growth and optimum yield quality for all crops. Vigro are designed for best plant absorption, distribution and utilization of nutrients. Supplements contained in Vigro help the plant in all the growing stages and through the stressful environmental conditions. Vigro provide plant with macro and micro nutrients in chelated form, and various natural organic supplements. Humic acids, amino acids and organic acids are used in chelating several nutrients and to ensure nutrient availability to plant. Plant derived growth regulators and energy sources help the plant throughout the growing season. Vigro liquids might include beneficial elements and other elements that ensure specific nutrient utilization and best plant response.

Company profile:
Manufacturer and agent of high quality Mineral , Biological fertilizers and Agricultural Chemicals.
We provide our client with many products as:-

1) Highly pure compound fertilizers (N-P-K) in solid and liquid forms available for using through fertigation systems [our fertilizers are highly soluable in a low pH and salinity index].
2) We provide highly pure and dissolving Chelated micro- nutrients as Fe, Zn, Mn, Mg, also provide Ca & Mg.(chelated by Amino Acids).
3) Specialized growth regulators for fruit setting and improving fruit, tubers and roots quality.
4) Amino acids either in instant dissolving powder or liquid forms.
5) Vitamins and Algae or seaweed Extracts.
6) Highly pure Humic acid and Fulvic acid (Solid and liquid forms).
7) Special formula for various soil problems as soil salinity, alkalinity, soil pests , fungi, and nematodes.
8) Our company provides special products based on natural resources for Bio and organic cultivation and Conforming with Biodynamics and organic culture Requirements (EL-MOWAFFER BIO).

The company has been awarded the excellence shield with an appreciation issue from the Egyptian Ministry of Agriculture 2009 and 2010.

Managing Director:
Eng. Yasser Manaseer
General Manager:
Mr. Fuad A. Sheikh

Company profile:
Manaseer Group realized the growing need for high quality fertilizers and chemicals in the agricultural market which prompted it to start the Jordan Modern Advanced Chemical Industries Company in the year 2002.
The company was established with an initial investment of 2 million US dollars. Using creative ideas and solutions, the company has become one of the most reputable specialized companies in the production and export of fertilizers and chemicals in the world.

Our Factories
A French designed NPK Water Soluble Fertilizer factory that uses a special fully automatic mixing technology was constructed.
A Urea Phosphate plant was then created using Swiss technology. Production capacity of both facilities is 60 thousand

tons annually.

Our Products

- Water Soluble Fertilizers (WSP) – Tailor made
- Liquid and Suspension Fertilizers (NPK)
- Urea Phosphate (UP) 17-44-0
- Granular Dry Blend Fertilizers (NPK)
- Raw Materials (powder, granular and liquid)

Markets

The company's international marketing team exerts every effort to explore all world markets.

The customer base covers 27 countries on 4 continents. The goal is to expand the current market share and open further new markets.

Benefits

- High quality products according to international standards
- Tailored made fertilizer formulas meeting customer specifications
- Packaging made according to customer's requirements
- Producers (under license) for many multinational companies worldwide.

Company profile:
ThyssenKrupp – one of the big international industrial groups, headquartered in Germany - is inter alia active in the Plant Technology business. With more than 2,000 plants to its credit, ThyssenKrupp's Business Unit Plant Technologies – formerly named Uhde - is one of the world's leading engineering companies in the design and construction of chemical, refining and other industrial plants.

ThyssenKrupp has local organizations in all four corners of the globe. This intelligent worldwide network is active in a number of different fields of plant technologies: fertilizers, electrolysis, gas technologies, oil, coal and residue gasification, refining technologies, organic intermediates, polymers and synthetic fibers as well as coke plant and high-pressure technologies.

We offer our customers not only cost-effective high-tech solutions in industrial plant construction and the entire range of services associated with an EPC contractor but also comprehensive service packages for the entire life cycle of their plants. ThyssenKrupp is a leading supplier of fertilizer production technologies and complete fertilizer plants and has outstanding experiences in the Middle East and North Africa.

Company Profile:
Established In Year 2006 in Porto Alegre in Brazil, and expended to India & UAE in Year 2009. Further in 2010. New manufacturing unit established in Uberaba in Brazil.

Main Activities
Manufacturing and Supplying latest generation Specialty products & Providing World Class Expert Technical Services for Fertilizer Quality Improvement

Notable Achievements

Company Manufactures:

1. Anti-caking Agents for Urea, NPK, DAP, MAP, AN, AS & other Phosphatic & Mixed Fertilizers
2. Granulating Aids
   For NPK, DAP, MAP, CAN, AN ANP, AS and other phosphatic Complex fertilizer.
3. Dust Suppressor for fertilizer dust control, Sulphur & Rock Phosphate Handling.
4. Micro Nutrient Binders
5. Filtration Aid
6. Defoamers for Phosphoric Acid Plants and for Phosphatic Fertilizer plants.
7. Froth Flotation Agents for purification of rock phosphate and other minerals.

Compressor Controls Corporation

(Associate)

P.O. Box: 109174 Abu Dhabi,
UAE
Tel: +971 2 446 9671
Fax: +971 2 4469672
Email: oaboushabab@cccglobal.com

Regional Manager:
Mr. Osama Abou Shabab

Company profile:
CCC focuses on improving process uptime/product quality with precise turbomachinery control. For Urea production this means maximizing plant turndown without CO2 compressor recycle, steam turbine extraction control without live steam bypass, withstanding process disturbances without trip or compressor surge, and fully automated control with the minimum of operator intervention.

For Ammonia production precise control compressor services helps long continuous runs while maximizing process efficiency. At last count CCC controls were increasing profits with precise control on 220+ fertilizer compressor trains.

www.armico.com

Chairman:
H.E. Farraj Fahed Al-Mutairi
General Manager:
Mr. Talal A. Al-Saadi

Company profile:
The Arab Mining Company was established pursuant to a Resolution by the Arab Economic Unity Council on 10/6/1974, with view to consolidating the Arab economic ties on bases of mutual cooperation for the utilization of mineral resources in diversified productive projects. This is vital in the realization of Arab economic integration.
The memorandum of Association of the Company was signed on1/2/1975 as an Arab shareholding company, open for subscription by Arab governments or Arab companies and institutions nominated by these governments. The company's Articles of Association were ratified on 2/8/1975.
The company shall engage in all technical industrial and commercial activities related to the mining industry, in particular the exploration, extraction, concentration, processing, transportation, marketing and manufacture.

Pursuant to a resolution by the Extraordinary Meeting of the General Assembly on 28/8/1994, the paid up capital of the company fixed at KWD 54.47 million (5,447 shares, KWD 10,000 each share).

Tel: +971 4 227 1616
Fax: +971 4 227 1588
Email: aaarabi@emirates.net.ae

Chairman:
H.E. Mr. Ali Bin Saeed Ali Al-Sharhan
General Manager:
H.E. Mr. Ali Bin Saeed Ali Al-Sharhan

Capital: The authorized capital is KD 150 million. The paid-up capital, as at 1.1.2009, was KD 100 million (about $364 million).

Member countries: 20 shareholder countries, namely, Saudi Arabia, Kuwait, United Arab Emirates, Sudan, Iraq, Qatar, Egypt, Algeria, Morocco, Mauritania, Syria, Somalia, Tunisia, Oman, Bahrain, Jordan, Lebanon, Palestine, Yemen, and Comoros.

Agricultural Investment Activity:
The agricultural investment activity of AAAID is composed of shareholdings in companies, as well as loans to support and develop some of the companies in which it has shareholdings. The total amount of this investment activity, as at the end of 2008, was $555 million. Number of companies: 25 existing companies, and 5 companies under implementation.

Technology Transfer: AAAID has succeeded in applying modern production technology packages and equipment, establishing pilot projects to be followed by other investors. The most outstanding of these is the zero-tillage farming system which increased crop yield by 300%. It designed a program for dissemination of this system to small farmers. It started implementing it and achieved impressively successful results. Thus, the model presents an opportunity for fighting hunger, boosting rural development. This can be achieved by cooperation with financial institutions and organizations concerned with food security and poverty alleviation.

الاتحاد العربي للأسمدة

AFA

الاتحاد العربي للأسمدة هيئة عربية دولية – أسس عام 1975 ويعمل تحت مظلة مجلس الوحدة الاقتصادية العربية والمجلس الاقتصادي والاجتماعي للجامعة العربية بدرجة مراقب.

يجمع الاتحاد المؤسسات والشركات العربية العاملة في مجال صناعة وتجارة الأسمدة وخاماتها والمجالات ذات العلاقة بذلك. يضم الإتحاد في عضويته 185 شركة عربية وأجنبية من خمس وثلاثين دولة من أنحاء العالم.

يهدف الاتحاد بوجه عام تنسيق وتنمية وتطوير العلاقات الفنية وكل ما له صلة في مجال صناعة الأسمدة واستخداماتها بين الشركات الأعضاء.

رسالة الاتحاد

الاستغلال الأمثل للموارد الطبيعية المتاحة وتحقيق أعلى قيمة مضافة والمساهمة الفاعلة في التنمية الإقتصادية والاجتماعية والتكامل في صناعة الأسمدة بأنواعها ودعم البحث العلمي الهادف في مجال صناعة الأسمدة واستخداماتها والحفاظ على البيئة والانسان.

أهداف الاتحاد

يهدف الاتحاد بشكل عام إلى السعىّ لتنمية وتطوير صناعة الأسمدة وخاماتها ومجالات استخداماتها، مع مراعاة المعايير والمتطلبات البيئية، وذلك بتكثيف وتنسيق التعاون البينى فى مختلف المجالات ومع الجهات المتخصصة ذات العلاقة مع إبراز الدور التكاملى والريادى فى تدعيم الإنتاج الزراعى مساهمة فى تحقيق الأمن الغذائى، وليس من أهدافه مزاولة أعمال تجارية أو تحقيق أرباح ذاتية.

الجمعية العمومية

تتألف الجمعية العمومية من الأعضاء العاملين ، الأعضاء المنتسبين والأعضاء المراقبين.

فئات العضوية

أعضاء عاملون:

الشركات والمؤسسات العربية العاملة في صناعة وإنتاج الأسمدة المعدنية وخاماتها النيتروجينية، الفوسفاتية والبوتاسية.

أعضاء منتسبون:

- الشركات والمؤسسات العربية والغرف التجارية والصناعية التي تعمل في مجال إنتاج الكيماويات والمعدات ومستلزمات التصنيع وأية منتجات وسيطة لصناعة الأسمدة وخاماتها.
- الشركات الهندسية العربية التي تعمل في مجال تصميم أو تنفيذ مشاريع الأسمدة المعدنية وخاماتها.
- الشركات والمؤسسات الصناعية العربية التي تعمل في المجالات الاقتصادية والتنموية وتطوير استخدامات الأسمدة المعدنية وخاماتها.
- الشركات العربية المنتجة للأسمدة وخاماتها في طور التأسيس والإنشاء.
- شركات انتاج الكبريت.

أعضاء مراقبون:

- الشركات الهندسية غير العربية التي تعمل في مجال تصميم أو تنفيذ مشاريع الأسمدة وخاماتها.
- الشركات غير العربية التي تعمل في المجالات الاقتصادية والتنموية ذات الصلة بصناعة الأسمدة المعدنية وخاماتها.
- الشركات غير العربية التي تعمل في إنتاج الأسمدة المعدنية وخاماتها وإنتاج المعدات والكيماويات ومستلزمات صناعة الأسمدة والتي تحت الإنشاء لحين الإنتاج التجاري.

أعضاء مؤازرون:

مراكز البحوث في صناعة الأسمدة المعدنية والشركات العاملة في تجارة الأسمدة ومستلزماتها الزراعية وإنتاج عبوات البلاستيك وشركات النقل وشحن الأسمدة وخاماتها.

أعضاء إختصاص:

الأفراد من أصحاب الخبرة والاختصاص في المجالات ذات العلاقة بصناعة الأسمدة وخاماتها واستخداماتها من غير الشركات الأعضاء.

تقـديـم

في ضوء التطور الواضح والدور الكبير الذي تلعبه صناعة الأسمدة على المستويين الإقليمي والدولي في دفع عجلة التنمية المستدامة في توفير الغذاء، يسعد الأمانة العامة للإتحاد العربي للأسمدة أن تضع بين أيديكم دليل الأعضاء لعام 2014 الذي يعد مرجعاً هاماً للعاملين في حقل صناعة وتجارة الأسمدة والقطاعات الأخرى ذات العلاقة.

وعليه، نتمنى لصناعة الأسمدة مزيداً من النمو والإزدهار،،

والله الموفق،،،

الدليل منشور على موقع الإتحاد بالشبكة الدولية (الإنترنت).

الأمانة العامة

Stamicarbon, the innovative, experienced and reliable licensor

Stamicarbon
Stamicarbon, the licensing and IP Center of Maire Tecnimont, is the global market leader in the development and licensing of patented urea technology, with a market share of more than 50% in synthesis and about 35% in granulation technology. Stamicarbon grants licenses for new urea plants, providing the urea producer with all the knowledge and resources to build a reliable, state-of-the-art, low cost and profitable urea plant.

Innovations
Innovation drives performance in the fertilizer industry. Stamicarbon maintains its leading position by its continuous high-quality innovations in close cooperation with research institutes, suppliers and customers.
This has lead to developing breakthrough innovations:

- AVANCORE® Urea Process
- Mega Plant Technology
- Urea 2000plus™ Technology
- Urea Granulation Technology
- Safurex® Stainless-steel material

Reliable experience

- Stamicarbon has over 65 years' experience in licensing
- It has licensed over 260 plants
- It has revamped over 90 urea plants with Stamicarbon and non-Stamicarbon technologies.
- Stamicarbon is committed to Full Life Cycle Services:
  - Plant revamping/debottlenecking
  - Supply of proprietary and critical equipment
  - Plant and equipment inspections
  - Troubleshooting

Stamicarbon
Stamicarbon, the licensing and IP Center of Maire Tecnimont, is the global market leader in urea technologies and services, delivering optimum environmental performance, safety, reliability and productivity at the lowest investment level. Working in close cooperation with our licensees, contractors, suppliers and research institutes, we are constantly developing new processes and upgrading our existing technologies.
